## NATURAL MATHS

## \&

Note: This document that shows how Natural Maths materials relate to the key topics of the Australian Curriculum for Mathematics. The links describe the publication and page number of the activities, using the following codes:

NMS - Natural Maths Strategies series (published by Blake Education)
SM-N - Strategic Maths - Number series (published by Blake Education)
LM - Linear Measurement series (published by Natural Maths)
PS - Problem Solving by Level series (published by Natural Maths)
CAL - the Calendar Software (published by Natural Maths)
PV100 - activities from Place Value to 100 and Beyond (published by Natural Maths)
These codes are then followed by the number or letters of the book in the series and the page number. Thus, the reference:
SM-N LP1:22
refers to page 22 of the Lower Primary 1 book in the Strategic Maths - Number series.

## Foundation Year

## At this year level:

Understanding includes connecting names, numerals and quantities
Fluency includes counting numbers in sequences readily, continuing patterns, and comparing the lengths of objects directly
Problem Solving includes using materials to model authentic problems, sorting objects, using familiar counting sequences to solve unfamiliar problems, and discussing the reasonableness of the answer
Reasoning includes explaining comparisons of quantities, creating patterns, and explaining processes for indirect comparison of length
Number and Algebra

## Foundation Year achievement standard

By the end of the Foundation Year, students make the connections between number names, numerals and quantities up to 10. Students are able to compare and sort shapes and objects. They make connections between events and the days of the week

## Year 1

## At this year level:

Understanding includes connecting names, numerals and quantities, and partitioning numbers in various way
Fluency includes counting number in sequences readily forward and backwards, locating numbers on a line, and naming the days of the week
Problem Solving includes using materials to model authentic problems, giving and receiving directions to unfamiliar places, and using familiar counting sequences to solve unfamiliar problems and discussing the reasonableness of the answer
Reasoning includes explaining direct and indirect comparisons of length using uniform informal units, justifying representations of data, and explaining patterns that have been created

## Number and Algebra

| :--- | :--- | :--- | :--- | :--- | :--- |
| Chance |  |  |  | Games |
| Identify outcomes of familiar <br> events involving chance and <br> describe them using everyday <br> language such as 'will happen', <br> 'won't happen' or 'might <br> happen' (ACMSP024) |  | PS 1:34 |  |  |
| Data representation and <br> interpretation |  | NMS 2:59 |  |  |
| Choose simple questions and <br> gather responses (ACMSP262) | NMS 2:52 |  |  |  |
| Represent data with objects <br> and drawings where one object <br> or drawing represents one data <br> value. Describe the displays <br> (ACMSP263) | NMS 2:53 | NMS 2:55 2:56 |  |  |

## Year 1 achievement standard

By the end of Year 1, students recognise and communicate number sequences. They solve simple addition and subtraction problems, and are familiar with Australian coins. They describe a representation of a half. Students collect data from questions to draw and describe simple data displays. Students compare lengths and describe two-dimensional shapes and three-dimensional objects. They communicate time duration and can follow simple directions.

## Year 2

## At this year level:

Understanding includes connecting number calculations with counting sequences, partitioning and combining numbers flexibly, identifying and describing the relationship between addition and subtraction and between multiplication and division
Fluency includes counting numbers in sequences readily, using units iteratively to compare measurements, listing possible outcomes of chance events, and describing and comparing time durations
Problem Solving includes formulating problems from authentic situations, making models and using number sentences that represent problem situations, planning routes on maps, and matching transformations with their original shape
Reasoning includes using known facts to derive strategies for unfamiliar calculations, comparing and contrasting related models of operations, describing connections between 2-D and 3-D representations, and creating and interpreting simple representations of data

## Year 2 achievement standard

By the end of Year 2, students recognise and communicate number sequences involving twos threes and fives. They are familiar with collections up to 1000 and recognise the connection between addition and subtraction. Students describe patterns with numbers and represent problems involving addition and subtraction by number sentences. They understand the value of collections of Australian coins. Students collect information and create data displays and interpret the information. They describe outcomes for everyday events. Students compare and order different shapes and objects using informal units. They use calendars to identify dates and seasons. They draw two-dimensional shapes and describe one-step transformations.

## Year 3

At this year level:
Understanding includes connecting number representations with number sequences, partitioning and combining numbers flexibly, representing unit fractions, using appropriate language to communicate times, and identifying environmental symmetry
Fluency includes recalling multiplication facts, using familiar metric units to order and compare objects, identifying and describing outcomes of chance experiments, interpreting maps and communicating positions
Problem Solving includes formulating and modelling authentic situations involving planning methods of data collection and representation, making models of three-dimensional objects and using number properties to continue number patterns
Reasoning includes using generalising from number properties and results of calculations, comparing angles, creating and interpreting variations in the results of data collections and data displays

| Represent money values in multiple ways and count the change required for simple transactions to the nearest five cents (ACMNA059) | NMS 3:28, 3:52 | NMS 3:7 <br> PS 3:48 | SM-N MP1:61, MP1:117 |  |  |

|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment | Games |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Patterns and algebra |  |  |  |  |  |
| Describe, continue, and create <br> number patterns resulting from <br> performing addition or <br> subtraction (ACMNA060) | NMS 3:40, 3:147 | PS 3:16, 3:18 3:10 |  | NMS 3:19 | NMS 3:49 |

Measurement and Geometry

| Using units of measurement |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Measure, order and compare <br> objects using familiar metric <br> units of length, mass and <br> capacity (ACMMG061) | NMS 3:17 | NMS 3:`18-23 |  |  |
| Tell time to the minute and <br> investigate the relationship <br> between units of time <br> (ACMMG062) | NMS 3:16 3:24, 3:25 |  |  |  |
| Shape | PS 3:40, 3:44 |  |  |  |
| Make models of three- <br> dimensional objects and <br> describe key features <br> (ACMMG063 |  | NMS 3:9 3:46 |  |  |
| Location and transformation |  | PS 3:52 |  |  |
| Create and interpret simple grid <br> maps to show position and <br> pathways (ACMMG065) |  | PS 3:54 |  |  |
| Identify symmetry in the <br> environment <br> (ACMMG066) |  | PS 3:38, 3:42 |  |  |
|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment | Games |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Geometric Reasoning |  |  |  |  |  |
| Identify angles as measures of <br> turn and compare angle sizes in <br> everyday situations <br> (ACMMG064) |  | PS 3:50 |  |  |  |

Statistics and Probability

| Chance |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Conduct chance experiments, <br> identify and describe possible <br> outcomes and recognise <br> variation in results (ACMSP067) |  | PS 3:36 |  |  |
| Data representation and <br> interpretation |  |  |  |  |
| Identify questions or issues for <br> categorical variables. Identify <br> data sources and plan methods <br> of data collection and recording <br> (ACMSP068) |  | PS 3:32 |  |  |
| Collect data, organise into <br> categories and create displays <br> using lists, tables, picture <br> graphs and simple column <br> graphs, with and without the <br> use of digital technologies <br> (ACMSP069) | NMS 3:3, 3:5 | PS 3:32, 3:34 |  |  |
| Interpret and compare data <br> displays (ACMSP070) |  | PS 3:32 |  |  |

Year 3 achievement standard
By the end of Year 3 students recall number facts for single digit numbers and are familiar with collections up to 10000 . They describe number patterns involving addition and subtraction and recognise the connection between multiplication and division. They model and represent unit fractions. They count the change required and represent money values in various ways. Students conduct chance experiments and describe the possible outcomes. They create, interpret and compare data displays. Students compare objects using familiar units. They compare angle sizes and identify symmetry. They tell the time and interpret positions and pathways on maps.

## Year 4

At this year level:
Understanding includes making connections between representations of numbers, partitioning and combining numbers flexibly, extending place value to decimals, using appropriate language to communicate times, using informal units for comparing, and describing properties of symmetrical shapes
Fluency includes recalling multiplication tables, communicating sequences of simple fractions, using instruments to measure accurately, creating patterns with shapes and their transformations, and collecting and recording data
Problem Solving includes formulating, modelling and recording authentic situations involving operations, comparing large numbers and time durations, and using properties of numbers to continue patterns
Reasoning includes using generalising from number properties and results of calculations, deriving strategies for unfamiliar multiplication and division tasks, comparing angles, communicating information using graphical displays and evaluating the appropriateness of different displays

Number and Algebra

| :---: | :---: | :---: | :---: | :---: | :---: |
| Patterns and algebra |  |  |  |  |  |
| Explore and describe number patterns resulting from performing multiplication (ACMNA081) | PS 4:11 | PS 4:35 |  |  | NMS 3:47 |
| Solve word problems by using number sentences involving multiplication or division where there is no remainder (ACMNA082) |  | NMS 3:141, 3:106 |  | NMS 3:73 |  |
| Use equivalent number sentences involving addition and subtraction to find unknown quantities (ACMNA083) | NMS 3:64 <br> SM-N MP2:37, 2:54 <br> PS 4:9 | NMS 3:45, 3:59, 3:65-69 <br> PS 4:18, 4:31, 4:33 | SM-N MP 2:29, 2:39— 47, 2:57-65, 2:75— 81 | NMS 3:72, 3:108, 3:109 <br> SM-N MP 2:49, 2:52, <br> 2:67, 2:69, 2:83, 2:85 |  |

Measurement and Geometry

| Using units of measurement |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Use scaled instruments to <br> measure and compare lengths, <br> masses, capacities and <br> temperatures (ACMMG084) | NMS 3:112, 3:113 | PS 4:36 |  |  |
| Compare objects using familiar <br> metric units of area and volume <br> (ACMMG290) |  | NMS 3:68, 3:83, 3:92 |  | NMS 3:120, 3:121 |
| Convert between units of time <br> (ACMMG085) | NMS 3:124 | NMS 3:69, 3:131 |  | NMS 3:132 |
| Use am and pm notation and <br> solve simple time problems <br> (ACMMG086) |  | PS 4:49 |  |  |

|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment |
| :--- | :--- | :--- | :--- | :--- |
| Shape |  |  |  |  |
| Compare the areas of regular <br> and irregular shapes by <br> informal means (ACMMG087) | NMS 3:88 | NMS 3:95 |  |  |
| Compare and describe two <br> dimensional shapes that result <br> from combining and splitting <br> common shapes, with and <br> without the use of digital <br> technologies (ACMMG088) |  | PMS 3:44, 3:45, 3:94 |  |  |
| Location and transformation |  | PS 4:45 |  |  |
| Use simple scales, legends and <br> directions to interpret <br> information contained in basic <br> maps (ACMMG090) | NMS 3:76 |  | NMS 3:78-81, 3:89, |  |
| Create symmetrical patterns, <br> pictures and shapes with and <br> without digital technologies <br> (ACMMG091) | $3: 116$ |  |  |  |
| Geometric Reasoning |  | PS 4:53 |  |  |
| Compare angles and classify <br> them as equal to, greater than <br> or less than a right angle <br> (ACMMG089) | NMS 3:77 |  | NMS 3:84, 3:85 |  |

Statistics and Probability

|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment |
| :--- | :--- | :--- | :--- | :--- |
| Chance |  |  |  |  |
| Describe possible everyday <br> events and order their chances <br> of occurring (ACMSP092) |  | NMS 3:54, 3:129 |  |  |
| Identify everyday events where <br> one cannot happen if the other <br> happens (ACMSP093) |  | NMS 3:58, 3:130 |  |  |
| Identify events where the <br> chance of one will not be <br> affected by the occurrence of <br> the other (ACMSP094) |  | PS 4:41 |  |  |
| Data representation and <br> interpretation |  | NMS 3:55-58, 3:127 |  |  |
| Select and trial methods for <br> data collection, including <br> survey questions and recording <br> sheets (ACMSP095) |  | PS 4:37 |  |  |
| Construct suitable data <br> displays, with and without the <br> use of digital technologies, <br> from given or collected data. <br> Include tables, column graphs <br> and picture graphs where one <br> picture can represent many <br> data values (ACMSP096) | NMS 3:124 |  | NMS 3:56, 3:57, 3:58 |  |
| Evaluate the effectiveness of <br> different displays in illustrating <br> data features including <br> variability (ACMSP097) |  | NMS 3:56, 3:126, <br> $3: 128$ |  |  |

## Year 4 achievement standard

By the end of Year 4 students recall multiplication facts up to $10 \times 10$ and the related division facts. They are familiar with collections up to 100000 . Students recognise and locate familiar fractions on a number line and make connections between fraction and decimal notations. They solve problems by using relevant number sentences involving the four operations. Students describe the probabilities of everyday events. They investigate different methods for data collection, construct data displays and evaluate their effectiveness. Students convert between units of time and solve problems involving time duration. They compare areas of regular and irregular shapes and classify angles. They create symmetrical patterns and interpret the information contained in maps.

## Year 5

At this year level:
Understanding includes making connections between representations of numbers, using fractions to represent probabilities, comparing and ordering fractions and decimals and representing them in various ways
Fluency includes choosing appropriate units of measurement for calculation of perimeter and area, using estimation to check the reasonableness of answers to calculations and using instruments to measure angles
Problem Solving includes formulating and solving authentic problems using numbers and measurements, creating transformations and identifying line and rotational symmetries
Reasoning includes investigating strategies to perform calculations efficiently, creating financial plans, interpreting results of chance experiments and interpreting data sets

| Fractions and Decimals |  |  |  |  |  |
| Compare and order common unit fractions and locate and represent them on a number line (ACMNA102) | NMS 4:64 <br> SM-N UP1:36 | PS 5:32 | SM-N UP1:39-48 | NMS 4:13 <br> SM-N UP1:49-52 |  |
| Investigate strategies to solve problems involving addition and subtraction of fractions with the same denominator (ACMNA103) |  | NMS 4:72 | SM-N UP1:43 |  |  |
| Recognise that the number system can be extended beyond hundredths (ACMNA104) | NMS 4:5 | NMS 4:7, 4:11 |  |  |  |
| Compare, order and represent decimals (ACMNA105) |  |  |  | NS 4:12 |  |
| Money and financial mathematics |  |  |  |  |  |
| Create simple financial plans (ACMNA106) | NMS 4:28, 4:29, 4:113 | $\begin{aligned} & \text { NMS 4:8, 4:20, 4:21, } \\ & 4: 30-35,4: 114-117 \\ & \text { PS 5:18, 5:26 } \end{aligned}$ |  | NMS 4:24 |  |

|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment | Games |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Patterns and algebra |  |  |  |  |  |
| Describe, continue and create <br> patterns with fractions, <br> decimals and whole numbers <br> resulting from addition and <br> subtraction (ACMNA107) | NMS 4:40, 4:41, 4:47 |  |  | NMS 4:48-49 |  |
| Use equivalent number <br> sentences involving <br> multiplication and division to <br> find unknown quantities |  | NMS 4:44 |  |  |  |
| (ACMNA121) |  |  |  |  |  |$\quad$|  |
| :--- | :--- | :--- | :--- |

Measurement and Geometry

| Using units of measurement |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| Choose appropriate units of <br> measurement for length, area, <br> volume, capacity and mass <br> (ACMMG108) | NMS 4:17, 4:101 | NMS 4:6, 4:18, 4:19, <br> $4: 79,4: 105$ |  | NMS 4:25 |
| Calculate the perimeter and <br> area of rectangles using familiar <br> metric units (ACMMG109) | NMS 4:16 | NMS 4:23 |  |  |
| Compare 12- and 24-hour time <br> systems and convert between <br> them (ACMMG110 |  | PS 5:36, 5:40 |  |  |
| Shape |  |  |  |  |
| Connect three-dimensional <br> objects with their nets and <br> other two-dimensional <br> representations (ACMMG111) | NMS 3:89, NMS 4:89 | NMS 3:90-93 <br> NMS 4:92-93, 4:96- <br> 97 |  | NMS 3:96-97 |

|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment |
| :--- | :--- | :--- | :--- | :--- |
| Location and transformation |  |  |  |  |
| Use a grid reference system to <br> describe locations. Describe <br> routes using landmarks and <br> directional language <br> (ACMMG113) | NMS 4:77 | NMS 4:78, 4:85, 4:109 |  |  |
| Describe translations, <br> reflections and rotations of <br> two-dimensional shapes. <br> Identify line and rotational <br> symmetries (ACMMG114) |  | NMS 4:83, 4:95 |  |  |
| Apply the enlargement <br> transformation to familiar two <br> dimensional shapes and explore <br> the properties of the resulting <br> image compared with the <br> original (ACMMG115) | NMS 4:100 5:34, 5:38 |  | NMS 4:22 |  |
| Geometric Reasoning |  | NMS 4:103, 4:104 |  |  |
| Estimate, measure and <br> compare angles using degrees. <br> Construct angles using a <br> protractor (ACMMG112) | NMS 4:88 |  |  | NMS 4:108 |

## Statistics and Probability

| Chance |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- |
| List outcomes of chance <br> experiments involving equally <br> likely outcomes and represent <br> probabilities of those outcomes <br> using fractions (ACMSP116) |  | NMS 4:57 |  |  |
| Recognise that probabilities <br> range from 0 to 1 (ACMSP117) |  | PS 5:48 |  |  |

|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment | Games |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Data representation and <br> interpretation |  |  |  |  |  |
| Pose questions and collect <br> categorical or numerical data <br> by observation or survey <br> (ACMSP118) |  | NMS 4:54, 4:55 |  |  |  |
| Construct displays, including <br> column graphs, dot plots and <br> tables, appropriate for data <br> type, with and without the use <br> of digital technologies <br> (ACMSP119) |  | NMS 4:56 5:50, 5:52 |  |  |  |

## Year 5 achievement standard

By the end of Year 5 students identify and describe factors and multiples and use estimation and rounding to check the reasonableness of answers. They solve multiplication and division problems and compare, order and represent decimals. Students perform addition and subtraction of fractions with the same denominator and continue patterns with fractions and decimals. They plan simple budgets. Students list the outcomes of chance experiments as fractions. They pose questions to gather data and construct, describe and interpret different data sets. Students calculate perimeter and area of rectangles using appropriate units. They connect three dimensional objects with two dimensional representations. They measure and construct different angles and describe transformations of two-dimensional shapes, including the enlargement transformation. They identify line and rotational symmetry.

## Year 6

At this year level:
Understanding includes describing properties of different sets of numbers, using fractions and decimals to describe probabilities, representing fractions and decimals in various ways and describing connections between them, and making reasonable estimations
Fluency includes representing negative numbers on a number line, calculating simple percentages, using brackets appropriately, converting between fractions and decimals, using operations with fractions, decimals and percentages, measuring using metric units, and interpreting timetables
Problem Solving includes formulating and solving authentic problems using numbers and measurements, creating similar shapes through enlargements, representing secondary data, and calculating angles
Reasoning includes explaining mental strategies for performing calculations, describing results for continuing number sequences,
investigating new situations using known properties of angles, explaining the transformation of one shape into another, and inferring from the results of experiment

Number and Algebra

|  | Mental Routines | Problematised Sit ${ }^{\text {ns }}$ | Strategy Lessons | Assessment | Games |
| :--- | :--- | :--- | :--- | :--- | :--- |
| Number and place value |  |  |  |  |  |
| Identify and describe properties <br> of prime, composite, square <br> and triangular numbers <br> (ACMNA122) |  |  | SM-N UP2:95, <br> UP2:97, UP2:101 | SM-N UP2:105 |  |
| Select and apply efficient <br> mental and written strategies <br> and appropriate digital <br> technologies to solve problems <br> involving all four operations <br> with whole numbers <br> (ACMNA123) |  | NMS 4:107, 4:118 | SM-N UP2:75 -80, <br> UP2:93 |  |  |

Year 6 achievement standard
By the end of Year 6, students recognise the properties of special numbers. They connect fractions, decimals and percentages as different representations of the same number and solve associated problems. They write correct number sentences. Students predict and communicate probabilities using simple fractions, decimals and percentages and construct and interpret a range of data displays. Students connect decimal representations to the metric system and choose appropriate units of measurement to solve problems. They interpret and use timetables. Students investigate angles. They investigate combinations of transformations and apply the enlargement transformation.
